

Accelerate Business Agility

with the Multi-layered
CanopySM Managed Cloud

M O N I T O R I N G • M A N A G E M E N T • M A I N T E N A N C E

We wrap Technology Management around our Cloud hosting service because even in the cloud your technology needs monitoring, management and maintenance. Harnessing the full power of diverse Cloud services requires a knowledgeable managed services firm to ensure that resources perform optimally and are always available. CanopySM Managed Cloud assures high performance and the strictest of security.

Use the internet to access your business data and application resources from anywhere. Eliminate capital budgets with up-front cash and maintenance for each technology refresh. CanopySM Managed Cloud provides end-to-end monitoring for your applications, internet connections and remote access to deliver what you need when and where you need it.

As a first-class Cloud services provider, NPI utilizes industry-leading technology so you can be confident that even your most sensitive data is safe and secure.

With your applications in the CanopySM Managed Cloud your costs will stabilize and risks will decrease. This will lower expenses, increase reliability and enhance security—helping you to focus on the business of doing business.
